

# Your FREE Report: 29 Stocks You Must Avoid For the Next 12 Months

**As the Dow craters and titans fall,  
these ticking time bombs could soon follow...**

**If you have funds invested in ANY one of these stocks**

**GET OUT NOW!**

Fellow Investor,

Imagine having your life savings wrapped up in seemingly rock-solid financial titans — and then hearing terrible news about “blue chip” companies going belly-up... you can only watch helplessly while everything you’ve worked and saved for vanishes into thin air...

As you know, for many investors this isn’t just a nightmare — it’s real.

In addition to losing their shirts, they were also left scratching their heads: *How could this happen? Didn’t anyone see this coming?*

And not only that... but who’s next?

Thankfully, I was able to warn many investors in December 2007 of the coming **mortgage meltdown, bank nationalizations and a ban on short-selling**. While countless others were caught way off-guard and swept out to sea, we got out just in time and dodged a major bullet.

Not only that, we bet against the big financial “blue chips” and made big profits on fallen giants like **Bank of America, reaping 95% gains in 2 days** and **45% on Fannie Mae in 1 week** — but more about that a little later.

Allow me to introduce myself. I’m Jon Markman, editor of **Trader’s Advantage**. You may have read one of my many columns in **MSN Money** or **TheStreet.com** over the past ten years, or seen me on TV. I’m also a co-inventor on two **Microsoft** patents and have been a longtime pioneer in the development of stock-rating systems and screening software.

But right now I want to do everything I can to help you stop the bleeding in your portfolio. I want you to avoid what so many other investors have been through by rushing you my special new report, **29 Stocks You Must Avoid for the Next 12 Months**, at absolutely no cost.

Some of the 29 companies in this report are household names, while others may not be so familiar. But they could *all* pose a huge threat to your retirement, your portfolio and your very lifestyle in the next 12 months.

And after the major calamity that we were able to avoid, I believe that it is my duty to make sure that as many other investors as possible can do the same.

But I don’t just want to help you protect what you already have, I also want to share with you — absolutely free — the opportunity to rake in rapid gains like these:

- **Hershey: 272% in 18 Days**
- **Newmont Mining: 65% in 3 Weeks**
- **Fannie Mae: 45% in 1 Week**
- **Visa: 125% in 5 Days**
- **Morgan Stanley: 57% in 2 Days**
- **Bank of America: 95% in 2 Days**

Remember the stock-rating systems and screening software I mentioned above?

Just a few years ago, I developed what has to be **the most powerful and predictive stock-ranking system ever**. It’s a deadly accurate trading system that spots fast-moving price swings in the market—**days before stocks take off**.

It’s allowed us to make the kind of spectacular profits above on once sacred cows like **Bank of America** and **Fannie Mae** in just days. Heck, we even made **a tidy 17% in Lehman Bros.** shortly before its demise!

(Believe me, there’s nothing more exhilarating than shorting overvalued stocks just in time for massive gains — and then watch irresponsible, power-hungry politicians and their corporate sycophants scream bloody murder on the way down.)

Here’s the best part: You don’t have to decide between playing for nickels with day trading (and then handing over your winnings in trading costs), or hoping, waiting and praying for long-term buy and hold profits that may never arrive.

Not with **Swing Trading**. Swing traders are able to capture huge gains in a matter of days by using price trends and patterns to identify the potential for big short-term changes in price momentum. They use these patterns to move in and out of stocks quickly, without competition from major traders.

Best of all, this environment is the perfect time to jump in on it!

Investors are very wary about the fundamentals of many companies and want to avoid getting burned, creating massive volatility. So as bulls and bears viciously duke it out in this uncertain climate, many long-term investors are whipsawed mercilessly back and forth like rag dolls.

But those with access to my unique swing trading system know when to buy positions at key pivot points right before big momentum shifts... and then hold for just a few days or weeks to reap blockbuster returns like these:

- **Gilead: 111% in 13 days**
- **Teekay Shipping: 40% in 2 days**
- **InterContinental Exchange: 77% in 18 days**
- **eBay: 87% in 2 days**
- **Apple: 50% in 1 day**
- **Ryder: 86% in 2 days**

Imagine a system like this that allows you to **reap 20% to 100% or more** on the upside of every trade — with strict trading rules that give you a huge cushion of safety on the downside...

Please don’t get me wrong — not every trade is a winner. But I *can* tell you that we’ve managed to limit our losses to less than 8% on average in each trade.

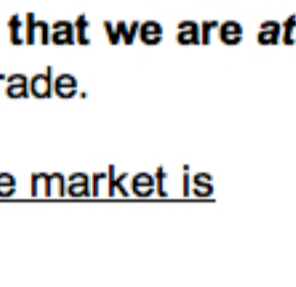

That’s because I’m not about to sugarcoat our losses or sweep anything under the rug, which allows me to correct errors as quickly as possible so you can bounce back with ease and speed to continue reaping spectacular profits.

And instead of just providing a scattershot approach that leaves you with the guesswork, we’ll send you only the very best handful of trades — **those that we are at least 90% sure of** — as well as specific entry and exit points for each trade.

It’s easy and fun... you know when to buy and when to sell every day the market is open.

But there’s something else I want you to have...

Our investors have just received a buy signal on 3 special stocks — stocks with a strong possibility of **DOUBLING** in value very soon. As this could happen any day now, I want you to know their names, too. You’ll learn all about them in your 2ND FREE REPORT, **3 Big Bear Market Winners**.

Make no mistake, the information in these reports could both save you a ton of grief and put a handful in your pocket.
